**Subject:** Fwd: Wed meetings on screening levels and data

So we will have meeting schedule for today sometime this am. I believe we could not get the 8 am scheduled today because of all conflicted schedules for locals etc . I believe that meeting is scheduled for 3:30. ( nat can you confirm and get the meeting schedule out?) this also allows to get more ready with RSLs and data which is something we have to coordinate with ha and the other regions and CO

Holding the call with R6&9 at 10:00 delays this schedule. Is there any way to move that up? We need to ideally get to an outcome this morning with all parties.

I am just ensuring you are on the same page on this...

I was told by David O that you participated in a meeting yesterday about coordination of data releases. That a processes has been established with a schedule to release screening levels and data. And that you have agreed to that process. Regions 6 and 9 called a conference call for 10 am to discuss these issues that include a number of folks either HQ including tox. Although I have had our screening values reviewed by CO, and others, the other regions want buyin from broader group. So, presenting these values and our data to Durango city and county this morning before those Agencywide folks are in agreement will be a problem if the screening values change again as an outcome of the 10 am meeting.
